

Hai Long Do . Jarvis Consulting

I am a Computer Engineering new grad from Seneca College. Throughout my college, I gained experiences in Software Development and Networking. I'm also having realworld practical experience in Networking as IT Systems Technologist during my Co-op term. Besides, I'm very interested in Web development and having practical experience by building site project from Front-end, Back-end to Full-stack which popular language and frameworks such as JavaScript, React, NodeJS, ASP.NET, etc,.. After graduate, I decided join in Jarvis training program for Software Engineer position. Currently, I am looking for an greate environment where I can apply my technical and soft skill that I have learned, also a place where I am able to continue to improve myself.

Skills

Proficient: Java, JavaScript, TypeScript, React/Redux, NodeJS, Linux/Bash, RDBMS/SQL, MongoDB, Agile/Scrum, HTML/CSS, Bootstrap 5/ Tailwind CSS, Git

Competent: C#, ASP.NET, Docker, NextJS, JWT

Familiar: C/C++, Python, Django, Material UI, Angular

Jarvis Projects

Project source code: https://github.com/jarviscanada/jarvis_data_eng_HaiLong

Cluster Monitor [GitHub]: Developed a cluster resource monitoring program that collects data CPU hardware specifications using Bash Shell Scripts. Provisioned a PostgreSQL instance using Docker. Stored static and dynamic real-time data in the psql instance. Automated dynamic real-time data retrieval every one minute using crontab. Inserted the specifications into two tables using DDL.

Core Java Apps [GitHub]:

- Twitter App: Curabitur laoreet tristique leo, eget suscipit nisi. Sed in sodales ex. Maecenas vitae tincidunt dui, et eleifend quam.
- JDBC App: Curabitur laoreet tristique leo, eget suscipit nisi. Sed in sodales ex. Maecenas vitae tincidunt dui, et eleifend quam.
- Grep App: Curabitur laoreet tristique leo, eget suscipit nisi. Sed in sodales ex. Maecenas vitae tincidunt dui, et eleifend quam.

Springboot App [GitHub]: Not Started

Python Data Analytics [GitHub]: Not Started

Hadoop [GitHub]: Not Started

Spark [GitHub]: Not Started

Cloud/DevOps [GitHub]: Not Started

Highlighted Projects

ILearn [GitHub]: Developed a MERN stack app for tracking and modify learning process. Implemented JsonWebToken for authentication. Implemented React in frontend site and Context API as state management. Implemented ExpressJS in backend. Applied MongoDB for storing data.

E-commerce Web API [GitHub]: Developed an Ecommercial ASP dotNET Web API. Implemented authentication using JsonWebToken. Handled paying by applying Stripe. Designed database using MongoDB.

Reddit clone [GitHub]: Developed Fullstack webapp cloning Reddit features. Applied ExpressJS framework from backend and GraphQL as API instead of REST API. Implemented PostSQL for storing purpose. Applied NextJS from frontend and handle GraphQL API using Apollo. Improved SEO using getServerSideProps function. Generated code from GraphQL using GraphQL codegen. Styled web app using Charka UI. Implemented TypeScript for both side to reduce typing errors and errors handling efficiency

Professional Experiences

Software Developer, Jarvis (2022-present): Implemented several projects covering various technologies such as Linux, Bash, SQL, Java, Springboot. Collaborated together by using Agile methodology. Applied Scrum framework for daily and retrospect meetings

IT Systems Technologist, Seneca College (2020): Provided quality customer service by answering questions through emails and calls. Gained good feedbacks from resolving technical issues involving hardware and software applications. Delivered client support through Field Service Technology. Received return offer from the company

Education

Seneca College (2019-2021), Advanced Diploma, Computer Engineering Technology - Dean's List (2021) - GPA: 3.8/4.0
